Projects

NOTEBOOK

September 2022

Bengaluru

• It is a Notebook application, It uses react for Frontend and uses express to create and fetch the endpoints and MongoDB to store the notes, It uses JWT as authentication mechanism. Each note has a different id to store it and further update or delete it.

NEWSCRATE

August 2022

Bengaluru

• A React application which fetches the news from NEWSAPI and displays it in the Frontend. It is further divided into different sections of the news like Sports, Headlines, Science and others.

FIGHTING GAME

july 2022

Bengaluru

• It was one of my first projects built using pure HTML, CSS, JS. It uses Event listeners to listen for inputs from keyboard and DOM manipulation to update the DOM and decide the winner.
